

Contents

01	Tomasz GAJOWIK, Krzysztof RAFAŁ, Mariusz MALINOWSKI - Review of multilevel converters for application in solid state transformers	1
02	Zuzanna KRAWCZYK, Jacek STARZYŃSKI - Parallel implementation of the Artificial Ant Colony Algorithm applied to medical images segmentation	6
03	Mariusz ZDANOWSKI, Roman BARLIK - Winding geometry and determination of parasitic parameters for inductor with reduced capacitance	10
04	Andrzej Ł. CHOJNACKI – Analysis of Reliability of Low-Voltage Cable Lines	14
05	Katarzyna J. CHOJNACKA, Andrzej Ł. CHOJNACKI - Economically Reasonable Time of Operation of LV Cable Lines	19
06	Joanna KOLAŃSKA-PŁUSKA, Aleksandra KAWALA-JANIK - Implementation of multistep Gear and implicit Runge-Kutty methods for dynamics examination of a circuit containing non-linear coil	23
07	Jerzy MARZECKI - Load forecasting methods of mv/lv rural stations	26
08	Marek KOTT - The forecasting electricity consumption in households	30
09	Adam ŻUCHOWSKI, Janusz P. PAPLIŃSKI - The control system with corrector transforming the oscillatory object into the quasi-inertial dynamics	34
10	Bogumiła WNUKOWSKA - The criterions of the energy safety efficiency	38
11	Joanna BUDZISZ, Remigiusz SZCZEPANOWSKI, Piotr KRUK - An overview of transcranial direct current stimulation (tDCS)	42
12	Mirosław WCIŚLIK, Karol SUCHENIA – Analysis of the effect of design parameters of the rotor on the electric moment of the switched reluctance motor	46
13	Ryszard NIEDBAŁA, Marcin WESOŁOWSKI, Adam CZAPLICKI - New device for thermal insulation mounting	50
14	Wiesława MALSKA, Damian MAZUR - Analysis of the impact of wind speed for power generation on the example of wind farm	54
15	Rafał CZAPAJ-ATŁASA, Piotr RZEPKA, Mateusz SZABLICKI - Selection of predictors using automated statistical methods as a way of choosing the estimation method of daily peak demand of the National Power Grid	58
16	Grzegorz DUDEK, Paweł PEŁKA - Forecasting monthly electricity demand using k nearest neighbor method	62
17	Grzegorz DUDEK - Stochastic Optimization Algorithms for Learning GRNN Forecasting Model – Comparative Study	66
18	Marcin JANICKI - Methods of weather variables introduction into short-term electric load forecasting models - a review	70
19	Adrian HALINKA, Marcin NIEDOPYTALSKI - Evaluation of the correctness of operation of adaptive under-impedance criterion for HV single and double-circuit overhead power line with increased capacity	74
20	Robert PIECZARKO, Maciej SOŁTYSIK - Analysis of the impact of wind sources generation on the level of electricity prices on the SPOT market	78
21	Paweł PIOTROWSKI, Jerzy MARZECKI - The human expert versus traditional forecasting methods in the task of forecasting the annual electrical energy demand in rural transformer stations MV/LV	82
22	Łukasz ROKICKI - Control of AC/DC electronic power converter in hybrid low voltage microgrid	86

PRZEGLĄD ELEKTROTECHNICZNY Vol 2017, No 4

Contents

23	Edyta ROPUSZYŃSKA-SURMA, Magdalena WĘGLARZ - The barriers to the development of the dispersed renewable energy in the light of survey	90
24	Maksymilian PRZYGRÓDZKI, Piotr RZEPKA, Mateusz SZABLICKI, Jacek WASILEWSKI - Retrospective analysis of static capacitor banks operating conditions used in a transmission network	95
25	Antoni SAWICKI, Maciej HALTOF - Application of a linearization method for determining time constants of electric arc models with a rectangular current source	099
26	Rafał SOBOTA, Janusz SOWIŃSKI - Analysis of the thermoluminescence measurements of porcelain medium-voltage insulators	104
27	Adrian HALINKA, Piotr RZEPKA, Mateusz SZABLICKI - The „Propagation” of Unsymmetrical Faults by Phase Shifting Transformers	109
28	Piotr PAPLICKI - PM synchronous machine with flux barriers and embedded magnets in the rotor structure	113
29	Szymon BANASZAK - Frequency Response Patterns of Transformer Windings with Mechanical Faults	117
30	Adam GUBAŃSKI, Jacek REZMER - Determination relaxation parameters by using computational intelligence methods	121
31	Bożena ŁOWKIS, Jan KUPRACZ - Evaluation of the charge distribution on the electrets surface	125
32	Lazhar Manai, Mohamed Alaa Eddine Hasni, Faouzi Armi, Mongi Besbes - FPGA-Based 2D Addressing Mode in Programmed Matrix PWM for Multilevel Inverter Control	128
33	Jose Luis MEJIA OLIVAS, Haroldo DE FARIA JR., Thales SOUSA, Edmarcio A. BELATI - Optimal Capacity Planning of Renewable Distributed Generation in Active Distribution Networks to Reduce Greenhouse Gas Emissions	135
34	Jerzy MIKULIK - Solar-wind hybrid energy sources as an alternative for a traditional diesel generator	140
35	Andrzej MATRAS, Bogdan SAPIŃSKI, Marcin WĘGRZYŃSKI - A numerical analysis of an electromagnetic energy converter designed to power a magnetorheological damper	145
36	Ryszard SIKORA - Response to the remarks presented by Piotr Ostalczyk in the paper However: “Fractional calculus”	150
37	Maciej SIWCZYŃSKI, Sławomir ŻABA - Minimizing the voltage fluctuations of electric power source including internal losses	153
38	Szczepan PASZKIEL - Facial expressions as an artifact in EEG signal used in the process of controlling a mobile robot with LabVIEW	156
39	Andrzej ŁEBKOWSKI - Electric Vehicle Battery Tester	161
40	Andrzej SIKORA - Optimization of energy-aware computer network	166
41	Bogusław KAROLEWSKI, Paweł URBAŃSKI - Work analysis of renewable power plant with induction machines	172
42	Marian HYLA - Starting of synchronous motor with a microprocessor controlled power supply unit for the excitation	177
43	Zenon KIDOŃ, Jerzy FIOŁKA - Harmonic analysis of a complex-valued stabilographic signal	185
44	Tadeusz DASZCZYŃSKI, Waldemar CHMIELAK, Piotr CICHECKI, Bassem MHEMNNI - High frequency test measurements on physical model of power transformer with use of FRAX analyzer	189
