01	Iva PAVLOVA- MARCINIAK - Anti-smog solutions and renewable energy resources development as a way to achieve low – carbon economy	1
02	Iva PAVLOVA-MARCINIAK - Nuclear power plants application in Poland – a way to meet the requirements of the Paris Agreement	5
03	Rafał CZAPAJ, Pablo BENALCAZAR, Jacek KAMIŃSKI - Explanatory Variable Selection Using the MARSplines Method on the Example of Forecasting the Daily 15-minute Peak Power Load in the National Power System	9
04	Anna GAWLAK - Profitability analysis of investment projects in distribution networks	13
05	Henryk KOCOT, Paweł KUBEK - Short-term forecasting of the current carrying capacity of overhead HV and LV lines	17
06	Marek LIS, Andrzej SZAFRANIEC - Analysis of transient processes in a drive system with vertical pumps of susceptible motion transmission	21
07	Lubomir MARCINIAK - General earth fault protection for MV networks using wavelet decomposition and Bayesian criterion	25
08	Rafał CZAPAJ, Mateusz SZABLICKI, Piotr RZEPKA - The Concept of Explanatory Variables Automated Selection Methods Usage for Input Data Purchase Cost Optimization in the Scope of National Power System Daily Load Profile Forecasting	29
09	Antoni SAWICKI - Mathematical models of the electric arc of variable geometrical parameters and various heat dissipation methods	33
10	Mateusz SZABLICKI, Tomasz BEDNARCZYK, Piotr RZEPKA, Adrian HALINKA - The concept of area distance protection of multi-terminal lines	37
11	Michal IVANČÁK, Michal KOLCUN, Zsolt ČONKA, Dušan MEDVED - Modelling microgrid as the basis for creating a smart grid model	41
12	Krzysztof WALCZAK, Hanna MOŚCICKA-GRZESIAK, Piotr PRZYBYŁEK, Hubert MORAŃDA – Selected problems of moistening cellulose insulation of HV bushing	44
13	Maciej LECHMAN¹, Jan SUBOCZ - Assessment of the technical condition of the current transformers type J110	49
14	Krzysztof MAJER - The analysis of vibration of smoothing reactors working in single-phase rectifier systems	53
15	Tomasz PIOTROWSKI - Effectiveness assessment of selected graphical techniques for the interpretation of measured concentrations of gases dissolved in transformer oil	57
16	Piotr PRZYBYŁEK, Hanna MOŚCICKA-GRZESIAK, Hubert MORAŃDA - Innowacyjna metoda suszenia izolacji celulozowej transformatorów	61
17	Paweł WITCZAK - Analysis of vibration and stress in distribution transformer at operational short circuit	65
18	Piotr KUWAŁEK - The Application of Kernel Density Estimation for Aided the Process of Locating Sources of Voltage Fluctuations	70
19	Arif Nur AFANDI, Irham FADLIKA, Langlang GUMILAR, Takeshi HIYAMA - Operating Assessment of Local Power Grid Development Considered Captive Power Plant and Expanding Structure	75
20	Mykhailo ARTEMENKO, Larysa BATRAK, Sergii POLISHCHUK - New definition formulas for apparent power and active current of three-phase power system	81
21	Josip PAVLEKA, Srete NIKOLOVSKI, Marinko STOJKOV - Finding Optimal Location of FACTS device for dynamic Reactive Power compensation using Genetic Algorithm and Particle Swarm Optimisation (PSO)	86
22	Abdelhadi NAMOUNE, Rachid TALEB, Ahmed DERROUAZIN, Abdelkader BELBOULA - Integrated Solenoid Inductor with Magnetic Core in a Buck Converter	92
23	Azouaou BERKACHE, Zehor OUDNI, Hamid MEHADDENE, Hassane MOHELLEBI, Jinyi LEE - Inspection and characterization of random physical property defects by stochastic finite element method	96
24	Dmytro SNIZHKO, Anatolij KUKOBA - Ultrafast Potentiostat as Compromise between Current Sensitivity vs. Response Time	102
25	Kaset MUANGTHONG, Chakrapong CHARUMIT - Realization of a Carrier-based Discontinuous SVPWM Technique for Two-Phase Four-Leg Voltage Source Inverter	108
26	Said AZZOUC, Sabir MESSALTI, Abdelghani HARRAG - Innovative PID-GA MPPT Controller for Extraction of Maximum Power From Variable Wind Turbine	115
27	A. M. Shiddiq YUNUS, Makmur SAINI, Ahmed Abu-SIADA, Mohammad A.S. MASOUM - Impact of SMES Unit on DC-Link Voltage of DFIG during Various Types and Level of Faults	121
28	Vadim MANUSOV, Pavel MATRENIN, Nasrullo KHASANZODA - Power Loss Minimization by Voltage Transformer Turns Ratio Selection based on Particle Swarm Optimization	127
29	Piotr LEWANDOWSKI, Anna FELKNER, Marek JANISZEWSKI - Security analysis for authentication and authorisation in mobile phone	132
30	Krzysztof KRYKOWSKI, Zbigniew GAŁUSZKIEWICZ, Patryk GAŁUSZKIEWICZ, Janusz HETMAŃCZYK, Dariusz CAŁUS - High-speed Permanent Magnet Brushless DC Motors, Properties and Prospective Applications	139
31	Elżbieta SZYCHA, Leszek SZYCHA - Selected Issues of Energy-Efficient Induction Heating of Railway Rail	146
32	Michał ADAMCZYK, Teresa ORŁOWSKA-KOWALSKA - Field-oriented-control of the induction motor without measurement of phase currents	151
33	Lubomir BEŇA, Paweł KUT - Wind farms in the process of voltage regulation in the power system	156
34	Krzysztof Cyprian NOWASZEWSKI, Andrzej SIKORSKI - Application of GaN HEMT as a bidirectional switch in matrix converter	160
35	Konstantinos KOKKINOPOULOS, Paulina KANIA, Dariusz KANIA - Algorithmic method of determining the key of a musical piece	164
